Introduction

The file POBoxes.txt contains the data for the locations of post boxes in Singapore

Requirements

1. Parse and import this data into a relational database of your choice
2. Write scripts or code to answer the following
   a. List the postboxes that have no other postbox within 500m of them
   b. Which 2km x 2km land area in singapore has the most number of postboxes
   c. If the postboxes are ordered in alphabetical order, what is the longest sequence of postboxes that begin with the same word. For e.g. There are two postboxes that start with the word "Alexandra". Write a query to compute this.

Outline your approach and the steps you took to complete the requirements above.
